

ScreenLine, integrated blind systems

8 VERY GOOD REASONS TO CHOOSE SCREENLINE®

CLEAN FOR LIFE

NO RISK OF DAMAGE

LONG LIFE

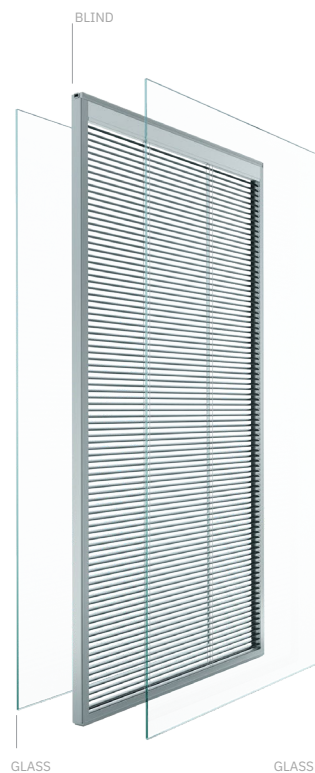

MAINTENANCE FREE

EXCELLENT LIGHT AND SOLAR CONTROL CHARACTERISTICS

DURABLE COMPONENTS

ENSURES PRIVACY

LINEAR DESIGN ALLOWS GREATER USE OF INTERNAL AREA

BENEFITS OF INTEGRATED BLIND SYSTEMS

ENERGY SAVING

LINEAR DESIGN

MAINTENANCE FREE

BEAUTY OF WINDOWS ENHANCED

LIVING COMFORT

VIEW THROUGH AND PRIVACY

HEALTHIER ROOMS

MORE VALUABLE BUILDINGS

Types of Shading System

- Filtering shading system with aluminium slats
- 16-20-22-24-27-29-32 mm airspace
- 10-, 12.5- and 16-mm slats, 0.2 mm thick
- Available in manual and motorised systems
- View through with the outside and privacy

- Blackout wave polyester film shading system
- 20-22 mm airspace
- Ultra-thin blackout film with 0.01% Light Transmission
- Available as a motorised system (M System)
- Can be controlled via wall buttons, remote control, app or automation systems

- Blackout fabric shading system
- 20-22-27-29-32 mm airspace
- 16- or 20-mm pleat fabric with 0% Light Transmission
- Aluminium-coated honeycomb structure
- No visible raising cords
- Black spacer bars

- Filtering fabric shading system
- 27 mm airspace
- Verosol high-performance metallised fabric with 3 different openness factors
- Available in corded system (C System)
- Patented integrated roller blind system

Motorised Systems

Motorised, Hard Wired

- Powered by the electrical system
- Controlled via wall buttons, app, remote control or automation networks
- Glass and window completely free from control devices
- Brushless motor, not subject to wear & tear
- Extremely quiet and accurate in slat positioning
- 200,000+ cycles certified by third-party bodies (IFT Rosenheim)

Battery-Operated

- Powered and controlled via a rechargeable battery module or remote control / app
- Battery module available in 4 colours
- Installation on glass or window frame without the need for an electrical system
- The optional external solar panel contributes to battery life
- Sanitized® antimicrobial finish on the battery module

Manual Systems

Knob

- Slat tilt-only function
- Installing the knob on the window frame leaves the glass completely clear
- Sanitized®* antimicrobial finish on the control knob

Cord

- Slat raising and tilting function
- Control kit and cord available in different colours
- Play safe automatic release system

Sliding Magnet

- Slat raising and tilting function
- Magnetic slider for both tilting and raising functions
- Side profile and slider available in different colours
- Sanitized®* antimicrobial finish on the slider

Bottom / Side Control

- Slat tilt-only function
- Bottom or side control applied to the glass
- Ideal for windowsill application
- Sanitized®* antimicrobial finish on the knob
